KIKEH FTL INSTALLATION AND PRE-COMMISSIONING COMPLETION

Dear Sir,

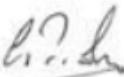

Murphy Oil wishes to congratulate SBM and its numerous subcontractors and vendors for the successful installation and pre-commissioning of the FTL GAP, which forms a key part of the Kikah project, the first deep water oil and gas development in SE Asia.

Launch from Bintulu, tow to site and hook-up of the FTL GAP system to the DTU and the FPSO were all completed using the multiple vessels spread lead by the flag ship multi-purpose vessel Normand Installer during simultaneous operations being performed on the DTU and the FPSO.

The installation and pre-commissioning was completed using saturation divers at 65m and 190m water depth and Offshore Subsea Works' DSV Stephanthurm, a new Malaysian depth record for construction diving was achieved.

Please thank your team including subcontractors and vendors for all the hard work they contributed to this challenging frontier deepwater project, which enabled Murphy to achieve First Oil on the 17th August 2007.

Regards,

Geoff Stone
Kikah Project FTL Manager
